

For 2-6 Players

Ages 9 to 99

Objective: To be the first player to get **5 chips** in a row **horizontally, vertically or diagonally**.

How to Play: Each player selects **1 color** of chips and may use only **1 chip** per turn. Players take turns rolling the dice and must use **all 3 dice**. With any **sequence or combination**, players **add, subtract, multiply** and **divide** the **3 numbers** to reach a number that will help them get **5 chips** in a row while **blocking their opponents** from doing the same.

Examples for a dice roll of 4, 4, and 7:

- $4 + 4 + 7 = 15$
- $4 - 4 = 0 \times 7 = 0$
- $4 \times 7 = 28 - 4 = 24$
- $4 \div 4 = 1 + 7 = 8$

See more examples for this roll: www.rival5game.com

If a player rolls **3 dice** of the **same number (triplets)**, he plays that roll and gets an additional turn. If he rolls triplets again (on the same turn) he removes from the board **1 chip of each opponent**, and the next person takes his turn. The first player to get **5 chips** in a row **horizontally, vertically, or diagonally** wins.

4 Levels – Progressive Skill Builder

- **Introductory:** Play entire board
- **Basic:** Play within **Blue** Lines
- **Intermediate:** Play within **Green** Lines
- **Advanced:** Play within **Red** Lines
